# The Digital Accelerator Framework

Designed to streamline system development and save time for business strategy leaders by delivering essential, out-of-the-box components from day one. For organizations looking to avoid the hassle of building a system from scratch, this approach provides immediate access to core features such as:

TO BE BUILT
- Offers Prospects
- Additional AI
- Customer 360
- Rewards Management
- Host Assistance
- Customer Pipeline (Prospects)
- Member Account Management

PREBUILT
- Mechanisms to Integrate
- Notes
- GenAI
- User, Roles, Permissions
- Menu, Branding
- Auditing

North Star

User Management:
Every system has users, roles, and permissions. Our framework rolls this out fully operational from the start.

Auditing and Compliance:
Essential auditing capabilities are built in, ensuring that regulatory and compliance needs are met without additional development time. As the product is built we will need to identify what actions require auditing.
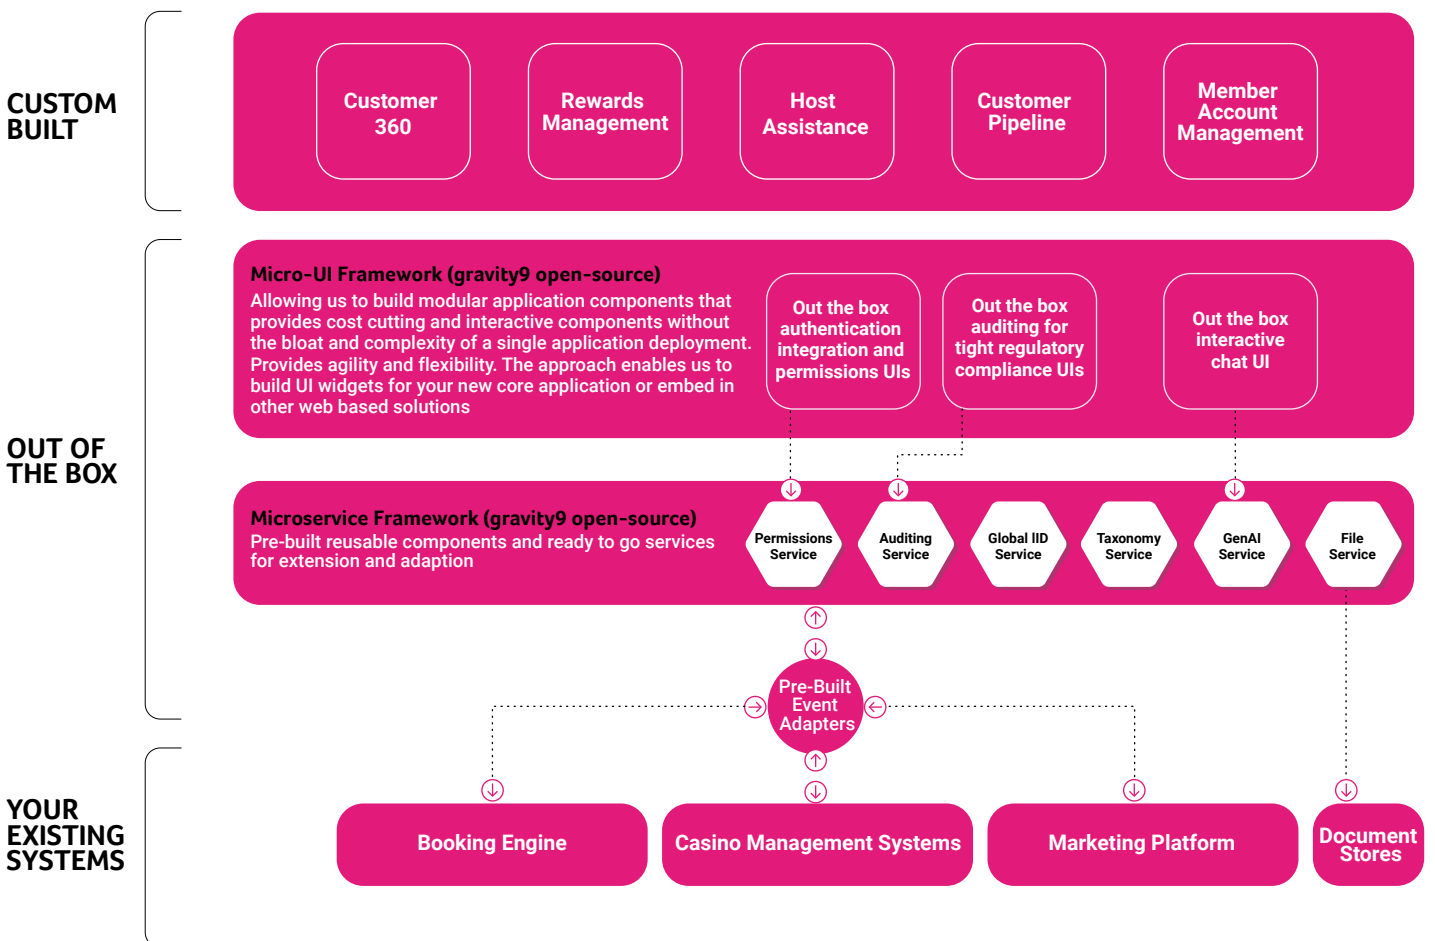

Menuing Systems:
A ready-to-use interface is included, so there's no need to design and structure a navigation system from the ground up.

GenAI:
Interactive Chat UI, Document Embedding, Conversational Assistant and "Agentic Solutions.

Integration Framework:
PreBuilt Event Adaptors ready for integrations with other systems as well as technology to support the disparate IDs between systems in a central repository.

CUSTOM BUILT

Customer 360	Rewards Management	Host Assistance	Customer Pipeline	Member Account Management

OUT OF THE BOX

Micro-UI Framework (gravity9 open-source)
Allowing us to build modular application components that provides cost cutting and interactive components without the bloat and complexity of a single application deployment. Provides agility and flexibility. The approach enables us to build UI widgets for your new core application or embed in other web based solutions

- Out the box authentication integration and permissions UIs
- Out the box auditing for tight regulatory compliance UIs
- Out the box interactive chat UI

Microservice Framework (gravity9 open-source)
Pre-built reusable components and ready to go services for extension and adaption

- Permissions Service
- Auditing Service
- Global IID Service
- Taxonomy Service
- GenAI Service
- File Service

Pre-Built Event Adapters

YOUR EXISTING SYSTEMS

Booking Engine	Casino Management Systems	Marketing Platform	Document Stores

With these foundational elements pre-built, we don't waste time staring at a blank canvas. Instead, the focus shifts immediately to your business domain, addressing your specific needs from the outset. This allows us to have a functional system up and running quickly, reducing lead time and letting you focus on strategic initiatives rather than technical groundwork.

Once the system is in place, we layer in custom features and adjustments based on your organization's unique requirements. This flexible, accelerated approach minimizes delays, mitigates risk, and ensures that your business can leverage the technology more efficiently, freeing you from the hassle of lengthy and complex development processes.
